OPEN SOURCE CONTRIBUTIONS

Hacktoberfest

Open Source Contributor

OCT-2025

- Successfully contributed to global open-source repositories, getting verified Pull Requests (PRs) accepted and merged
- Collaborated with open-source maintainers to fix frontend issues and improve layout responsiveness.
- Gained practical hands-on experience with version control workflows using Git and GitHub.

PROJECTS

ElectionIQ | JavaScript, Antigravity AI, HTML5, CSS3

MAY 2026

- Developed an interactive web application designed as a civic education assistant for the "PromptWars" challenge.
- **Ranked in the Top 400** globally out of thousands of participants in the Hack2skill initiative.
- Partnered with **Antigravity** (Google DeepMind's agentic AI tool) to architect the platform, leveraging autonomous AI workflows to optimize code performance.
- Engineered modular, accessible user interfaces to break down election timelines and provide real-time civic guidance.

Alumni Connect | HTML5, CSS3, JavaScript, Git

SEPT 2025

- Built a secure alumni networking web application during an intensive 36-hour coding sprint.
- Competed as a core developer for team Nexus Builders in the SOA Ideathon (Smart India Hackathon 2025 Internal Qualifier).
- Designed a dynamic directory with filtering features, a student-mentor portal, and an interactive community layout.

Media Discovery Platform & Sudoku | JavaScript, HTML5, CSS3

May 2025

- Built a responsive, multi-section media web page from scratch focusing on semantic HTML structure and clean CSS layouts.
- Programmed complete Sudoku game logic in pure JavaScript, handling user input flows, grids, and active game states.
- Developed as part of the core project assignments for the IIT Kharagpur workshop.
