## PROFESSIONAL SUMMARY

Computer Science undergraduate at ITER, SOA University (9.44 CGPA) specializing in full-stack web development and AI/GenAI. Builds end-to-end, real-time applications spanning modern frontends, backends, and voice/LLM pipelines, with hands-on experience from hackathons, open-source contributions, and independent projects.

## EDUCATION

### B.Tech, Computer Science & Engineering (IoT)

2024 - 2028

ITER, Siksha 'O' Anusandhan University, Bhubaneswar, Odisha | CGPA: 9.44/10

### Senior Secondary (Class XII), CBSE

2021 - 2023

Satyam International School | 77%

### Secondary (Class X), CBSE

2008 - 2021

St. Anne's High School | 79%

## EXPERIENCE

### Open Source Contributor | Hacktoberfest

OCT - 2024

- Submitted merged pull requests across public repositories, fixing frontend UI bugs and improving API documentation.
- Collaborated with maintainers through standard Git/GitHub workflows: branching, code review, and issue triage.

## PROJECTS

### Suraksha AI — AI Disaster Response Voice Assistant

Next.js, Python, LiveKit, Deepgram Nova-3, Google Gemini, Murf Falcon, WebRTC

- Architected a real-time, voice-first assistant delivering emergency safety guidance for flood, cyclone, earthquake, and landslide scenarios.
- Engineered a low-latency WebRTC pipeline linking Deepgram speech-to-text, Gemini LLM reasoning, and Murf Falcon streaming TTS over LiveKit.
- Integrated live transcript sync, emergency helpline lookups, and a responsive glassmorphic UI.

### YatraSaathi — Accessible Travel & Route Planning Platform

Next.js, React, FastAPI, PostgreSQL, PostGIS, SQLAlchemy, Tailwind CSS

- Developed an accessibility-focused travel app helping users discover accessible locations and navigation paths.
- Built a spatial backend with FastAPI and PostgreSQL/PostGIS for step-free paths, elevator routing, and barrier detection.
- Designed custom routing profiles (Avoid Stairs, Require Ramps) with user verification reporting.

### Earthquake Magnitude Prediction

Python, Machine Learning, SVM, Random Forest, Seismic Datasets

- Applied supervised machine learning models to forecast seismic event magnitudes based on geological features.
- Built preprocessing pipelines and tuned Random Forest and SVM classifiers for research evaluation.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, TypeScript, SQL

**Web & Frameworks:** HTML, CSS, React.js, Next.js, FastAPI, REST APIs, Tailwind CSS

**AI & GenAI:** Generative AI, LLM Integration, Prompt Engineering, Agentic AI, RAG, WebRTC (LiveKit), TTS/STT (Deepgram, Murf)

**Databases:** PostgreSQL, PostGIS, MySQL, MongoDB

**Cloud & DevOps:** Google Cloud Platform (GCP), Docker, Vercel, Git, GitHub, Postman, Linux

**CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems

**Spoken Languages:** English (Fluent), Hindi (Fluent)

## AWARDS & ACHIEVEMENTS

- Completed the Murf AI Challenge, 2026, shipping a voice-AI application within the challenge timeline.
- Top 400 globally, Build with AI / Prompt Wars, 2026.
- Google Cloud Study Jam, 2025 — earned 20+ skill badges across cloud and AI infrastructure.
- Participant, AI Day Bhubaneswar, 2025.
